

## **Press statement**

### **MARELLI to extend temporary operational measures across Europe in response to Covid-19**

**【March 26<sup>th</sup>, 2020】**

In relation to the temporary suspension of production activities in the majority of its European plants announced on March 19<sup>th</sup>, Marelli confirms that the measure will be extended also for next week, until April 3<sup>rd</sup>. This measure is related to all European sites, except for a number of local cases where operations will continue on a reduced scale, in line with specific customers' needs.

We are in ongoing dialogue with employees and customers on these changes and we maintain the flexibility to have plants fully operational again, in line with health and safety requirements and customer demand.
